Professional Summary

Software Engineering graduate with a Distinction in National Diploma from Highland College of Technology. Experienced STEM Facilitator with over one year of teaching and mentoring experience through GCI STEM Project. Skilled in Python programming, data analysis, Microsoft Excel, and technical instruction. Currently serving as an Assistant Lecturer during IT while seeking opportunities to apply technical, analytical, and educational skills in innovative organizations.

Education

National Diploma (ND) in Software Engineering — Distinction

Highland College of Technology

Completed: 2026

Relevant Coursework

- Software Engineering
- Python Programming
- Database Systems
- Data Analysis
- Systems Design
- Computer Applications

Work Experience

STEM Facilitator & Instructor

GCI STEM Project

January 2025 – Present

- Facilitate STEM and technology learning programs for students.

- Teach programming, digital literacy, and problem-solving concepts through practical sessions.
- Mentor learners on projects and assignments.
- Develop instructional materials and hands-on exercises.
- Collaborate with fellow facilitators to improve student engagement and learning outcomes.

Assistant Lecturer (SIWES)

Highland College of Technology
2026 – Present

- Assist lecturers in delivering academic and practical sessions.
- Support students in understanding software engineering and computing concepts.
- Help prepare teaching materials, assessments, and laboratory exercises.
- Provide academic guidance and technical support to students.

Software Engineering Intern (SIWES)

NumberOneGeeks Hub(3 Months)

- Assisted with software and technology-related projects.
- Participated in programming and technical support activities.
- Gained practical industry experience in software development and problem-solving.
- Worked collaboratively with team members on assigned tasks and learning projects.

Technical Skills

Programming

- Python
- SQL
- HTML/CSS (Basic)

Data Analysis

- Pandas
- NumPy
- Microsoft Excel
- Data Cleaning
- Data Visualization

Tools & Technologies

- Jupyter Notebook
- Google Colab
- Visual Studio Code
- Git/GitHub

Leadership & Community Service

STEM Mentor and Facilitator

GCI STEM Project

- Mentored students in technology and STEM-related subjects.
- Supported learners in developing technical and problem-solving skills.
- Encouraged participation in project-based learning activities.

Key Skills

- Software Development
- Data Analysis
- Technical Instruction
- Public Speaking
- Team Collaboration
- Leadership
- Problem Solving
- Communication
- Mentoring
